

**SESI Culminating Project
Planning Document**

Name: _____

My assigned ward: _____

1. Name **ONE change** you want to make to city of Allentown that **encourages smart growth**.

The change I would like to make is...

I think this change is an example of smart growth because...

2. The ONE plan element I wish to address is (please circle)

Energy and
climate change
reduction

Park system and
recreational
opportunities

Transportation and
safety systems

Economic
development,
commercial areas
and tourism

3. My change will address this element because it will...

a. **Reuse existing sites or change existing infrastructure** by...

b. Create **new development, features, facilities, parks, or open spaces** by...

c. Make the city **more livable (environmentally, socially, economically)** for its citizens
by...

4. In the table below, write in your selected element (from question 2, above). Then mark the FOUR (or more) themes you will incorporate while addressing this element. (Mark with an **X**.)

		My selected element:
Themes	Land Use	
	Environment & Natural Resources	
	Transportation	
	Economic Development	
	Neighborhood Conservation	
	Community Facilities	
	Housing	

5. **Describe** where you will make your change(s). Use geographic language such as north, south, east, and west; you can also use latitude/longitude.

Theme slide #1 / Topic (please circle)

Land Use	Environment & Natural Resources	Transportation	Economic development	Neighborhood Conservation	Community Facilities	Housing
----------	---------------------------------	----------------	----------------------	---------------------------	----------------------	---------

What **basemap** will help you explain this issue?

What **data layers** will help you explain this issue?

Take a screenshot from your GIS map to explain how your change addresses this theme. **Include added detail such as a legend and /or labels to communicate data or information.**

Write a caption for your slide about the map data or information that you want to communicate.

Theme slide #2 / Topic (please circle)

Land Use	Environment & Natural Resources	Transportation	Economic development	Neighborhood Conservation	Community Facilities	Housing
----------	---------------------------------	----------------	----------------------	---------------------------	----------------------	---------

What **basemap** will help you explain this issue?

What **data layers** will help you explain this issue?

Take a screenshot from your GIS map to explain how your change addresses this theme. **Include added detail such as a legend and /or labels to communicate data or information.**

Write a caption for your slide about the map data or information that you want to communicate.

Theme slide #3 / Topic (please circle)

Land Use	Environment & Natural Resources	Transportation	Economic development	Neighborhood Conservation	Community Facilities	Housing
----------	---------------------------------	----------------	----------------------	---------------------------	----------------------	---------

What **basemap** will help you explain this issue?

What **data layers** will help you explain this issue?

Take a screenshot from your GIS map to explain how your change addresses this theme. **Include added detail such as a legend and /or labels to communicate data or information.**

Write a caption for your slide about the map data or information that you want to communicate.

Theme slide #4 / Topic (please circle)

Land Use	Environment & Natural Resources	Transportation	Economic development	Neighborhood Conservation	Community Facilities	Housing
----------	---------------------------------	----------------	----------------------	---------------------------	----------------------	---------

What **basemap** will help you explain this issue?

What **data layers** will help you explain this issue?

Take a screenshot from your GIS map to explain how your change addresses this theme. **Include added detail such as a legend and /or labels to communicate data or information.**

Write a caption for your slide about the map data or information that you want to communicate.
